Subject: MLPA Proposal 2

Dear Committee,

I am writing in concern and support for the current proposals being considered by the council. I am in support of the MLPA Proposal #2 as this seems to be the most reasonable approach given the facts and circumstances. I understand that the plight of the fisheries is in serious decline, that being said, recreational fishing proponents are in support of sustainable stocks and a healthy populations. I have limited faith that politicians can ever see the "forest for the trees" but I am confident and urge that the MLPA Proposal #2 will be adopted.
